

Drain Opener 206

DESCRIPTION

206 is a concentrated liquid drain pipe opener for institutional and industrial maintenance. **206** is recommended for shock dosage when drains are clogged, as well as for preventative maintenance. **206** liquefies grease, soap scum, cellulose matter, hair and other organic matter. Unlike ordinary drain pipe cleaners, **206** does not form a hard soap on contact with grease; the grease is liquefied so it flows easily through the drain.

FEATURES

- Non-foaming
- Concentrated, ready-to-use
- Fast acting
- Liquefies grease, soap scum, cellulose, hair and other organic matter
- Will not harm pipes, porcelain, rubber or septic tanks

HOW TO USE

- **Completely stopped up drains:** Pour $\frac{1}{2}$ cup **206** in the drain, add 1 cup HOT water and let stand 10 minutes. If necessary, use plunger. Add additional **206**. For large floor drains, pour $\frac{3}{4}$ cup **206** in drain, add 2 cups HOT water.
- **For slow running drains:** Mix $\frac{1}{3}$ cup **206** with 1 cup HOT water. Pour in drain. Do not use drain for 5 minutes. For large drains, mix $\frac{1}{2}$ cup **206** with 2 cups HOT water.
- **For toilets:** pour $\frac{3}{4}$ cup **206** in toilet bowl, add 4 cups HOT water, let stand $\frac{1}{2}$ hour before flushing. Use plunger if necessary.

SPECIFICATIONS

Physical Form	liquid
Color	clear
Odor	none
Specific Gravity	1.13
Flash Point (TCC)	none
