

215

Steam Cleaner

DESCRIPTION

215 is a high strength steam cleaner for use in steam generators, Excellent for motors, machinery, equipment, metal parts, lifts, racks, and trucks, and is recommended for swimming pools and kitchens. Use in repair shops, service stations, metal working plants, restaurants, construction companies, airfields, municipalities, etc.

FEATURES

- Safe for use on iron and steel surfaces, but no on non-ferrous surfaces
- Provides a chemically treated surface that is corrosion resistant and promotes paint bonding
- Anti-coil clogging
- Fast cleaning and economical

HOW TO USE

Use approximately 2 to 6 oz. per gallon of water. This makes concentration in the jet from 1% to 5%. For extremely soiled surfaces use proportionately more. The amount can vary based on the type of machine used. An alternate method of calculating is to use 1 or 2 pints of 215 for every 3-4 gallons of an alternate cleaning compound now being used.

215 is a highly active and powerful descaler and may break off previously deposited scale, causing clogging. Pretreatment with 207 will prevent this from occurring.

Always test-patch on inconspicuous area before using on painted surfaces.

SPECIFICATIONS

Physical Form	Clear Liquid
Color	Green
Odor	Mildly sweetish
Specific Gravity	1.05
Flash Point (TCC)	none
